

**Amendments to the Claims:**

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently amended) A method of storing data on a storage device, such as a hard disc or DVD, said data representing video and/or audio signals and program information for at least one channel, comprising:

storing and/or displaying current program information of a new channel on a storage device after a change of channel; and

hiding and/or removing said the program information from the storage device if a new change of channel occurs within a first time period.
2. (Currently amended) The method of claim 1, further comprising including: hiding or removing said the program information if a change of to a new program in the current new channel occurs within a second time period after said the change of channel; and storing and displaying the new program information of the new program after said the change of to the new program.
3. (Currently amended) The method of claim 1, further comprising: including comparing the current program information with previously stored program information and refraining from storing and displaying said the current program information if the current program information is identical with any corresponds to the previously stored program information.
4. (Currently amended) The method of claim 1, wherein said the first time period is between 0.5 and 10 minutes, for example between 1 and 7 minutes, such as 2 minutes.

5. (Currently amended) The method of claim 4-2, wherein ~~said-the~~ the second time period is between 0.5 and 10 minutes, ~~for example between 1 and 7 minutes, such as 1 minutes.~~

6. (Currently amended) The method of claim 4-2, wherein the first time period is ~~equally long as~~ substantially equal to the second time period.

7. (Currently amended) The method of claim 1, ~~further comprising~~ including: displaying an editing bar ~~comprising that includes~~ representations of video and/or audio signals and program information; and changing a resolution of ~~said-the~~ the editing bar from a standard resolution of ~~for example 10 to 60 seconds per pixel~~ to an increased resolution of ~~for example one second per pixel~~ and vice versa.

8. (Currently amended) The method of claim 7, ~~further comprising~~ - including moving a cursor along ~~said-the~~ the editing bar and accelerating ~~said-the~~ the cursor.

9. (Currently amended) The method of claim 7, ~~further comprising~~ - including inserting chapter markings at ~~said-the~~ the editing bar at user defined positions.

10. (Currently amended) A device ~~for storing data on a storage device, such as a hard disc or DVD, said data representing video and/or audio signals and program information for at least one channel,~~ comprising:

a storage device,

a display controller that is configured to:

~~display a display bar for displaying~~ that displays program information on a monitor; ~~a means for displaying~~

~~display current program information on the monitor of a new channel after a change of channel;~~ and

a storage controller that is configured to:

store the current program information on the storage device, and

~~a means for removing~~ remove the program information from the storage device being displayed on the monitor, if a new change of channel occurs within a first time period.

11. (Currently amended) The device of claim 10, ~~further comprising: a means for removing said program information from being displayed on the monitor wherein the storage controller is configured to remove the current program information from the storage device,~~ if a change ~~of to a new~~ program in the ~~current~~ new channel occurs within a second time period after said ~~the~~ change of channel; and ~~a means for displaying and store program information of~~ the new program ~~on the storage device~~ information on the monitor after said ~~the~~ change ~~of to the new~~ program.

12. (Currently amended) The device of claim 10, wherein ~~said the~~ first time period is between 0.5 and 10 minutes, ~~for example between 1 and 7 minutes, such as 2 minutes.~~

13. (Currently amended) The device of claim 10 11, wherein ~~said the~~ second time period is between 0.5 and 10 minutes, ~~for example between 1 and 7 minutes, such as 1 minutes.~~

14. (Currently amended) The device of claim ~~10~~ 11, wherein the first time period is ~~equally long as substantially equal to~~ the second time period.

15. (Currently amended) The device of claim 10, ~~further comprising: wherein the display controller is configured to display an editing bar comprising that includes representations of video and/or audio signals and program information; and means for changing and to change a resolution of said the editing bar from a standard resolution of for example 10-60 seconds per pixel, to an increased resolution of for example one second per pixel and vice versa.~~

16. (Currently amended) The device of claim ~~10~~ 11, ~~further comprising: wherein the display controller is configured to display chapter markings inserted at said the editing bar at user defined positions.~~

17. (Currently amended) A ~~product on a computer-readable medium having embodied thereon a computer program for performing the method of claim 4 that is configured to cause a processor to:~~

~~store current program information of a new channel on a storage device after a change of channel; and~~

~~remove the program information from the storage device if a new change of channel occurs within a first time period.~~
